Cybersecurity Engineering Student (ESIEA) • GRC Apprentice @ LVMH

Cybersecurity Engineer — Governance, Risk (GRC) & Digital Assets

I help organisations control their technology and third-party risks (TPRM, DORA, ISO 27001), combining this with a solid technical background in blockchain investigation (on-chain, DeFi) and automation.

TARGET ROLE
GRC / Cyber-risk Engineer

AVAILABILITY
September 2027 — permanent

LOCATION
Paris · open to relocation

LANGUAGES
French · English · Chinese

ABOUT

I am a cybersecurity engineering student at ESIEA and an apprentice in LVMH's Group Cybersecurity team (Design & Compliance), where I assess third-party risk, run NIST CSF 2.0 compliance campaigns and help standardise the Group's security requirements.

My background as a developer (Python/Django) and my on-chain investigation experience at FAKGROUP let me work comfortably with technical teams as well as management, Procurement, Legal and the DPO.

I am passionate about economics, especially how money works — fiat and cryptocurrencies alike — and about blockchain, which I follow closely through active regulatory watch (MiCA, DORA, FATF).

CASE STUDIES & METHODOLOGY

How I work, through three concrete engagements.

01 GRC · LVMH

Third-party risk management (TPRM) & Security by Design in a global group

CHALLENGE
Assessing SaaS solutions and critical suppliers on an international scale (75 Maisons).

APPROACH
Classifying asset sensitivity (CIAT model: Confidentiality, Integrity, Availability, Traceability); moving from self-declared questionnaires to evidence-based verification (SOC 2 reports, ISO 27001 certificates, penetration tests).

OUTCOME
Decision memos for management and compensating controls, both technical (Okta SSO/MFA, IP filtering, AES-256 encryption) and contractual (Security Assurance Plans — SAP).

02 Blockchain · FAKGROUP

On-chain forensic investigation & blockchain flow analysis

CHALLENGE
Responding to blockchain-related security incidents and monitoring transaction flows.

APPROACH
Tracing transactions on block explorers (Etherscan, Solscan), analysing interactions with smart contracts, DeFi protocols and DEXs, detecting obfuscation patterns and anomalies.

OUTCOME
Automated extraction and parsing of transaction data with custom Python scripts to qualify suspicious behaviour (MAR / AML / CFT logic).

03 Compliance · LVMH

Group standardisation (Blueprints) & NIST CSF 2.0 compliance

CHALLENGE
Harmonising security standards and assessing the cyber maturity of multiple subsidiaries.

APPROACH
Running self-assessment campaigns across the 6 NIST CSF 2.0 functions (Govern, Identify, Protect, Detect, Respond, Recover) and structuring the catalogue of recommended secure products (Blueprints).

OUTCOME
Precise mapping of compliance gaps and pragmatic support for business teams (Build & Run).

EXPERIENCE

Professional experience

Sept. 2024 – Present

Cybersecurity Governance, Risk & Compliance (GRC) Apprentice

LVMH (Holding) · Paris

- Assessing the security maturity of critical suppliers (TPRM), reviewing evidence and weekly risk decisions.
- Running NIST CSF 2.0 compliance campaigns across the Group's Maisons.
- Strategic Blueprints project: standardising IT/Cloud security requirements with Procurement, Legal and the DPO.

Sept. 2023 – Aug. 2024

Developer & Security Apprentice

FAKGROUP · Paris

- Blockchain forensic investigation, on-chain flow tracing and incident analysis.
- Secure full-stack development (Python/Django), OWASP Top 10 remediation and security controls in CI/CD pipelines.

Jul. 2022 – Aug. 2022

Web Developer & Automation Intern

PIXIM Communication · France

- Automated transactional workflows in Python/Django and optimised relational databases (CRM/ERP).

EDUCATION & AWARDS

Education

2024 – 2027

Engineering Degree, Cybersecurity major

ESIEA · CTI-accredited, Master's level · Paris

2021 – 2024

Bachelor's in Cybersecurity

EPITA · Paris

CTF DISTINCTION

Top 5% worldwide on Root-Me

3,900+ points. Regular practice of investigation, web security and complex technical problem-solving challenges.

SKILLS

Areas of expertise

Governance, Risk & Regulation

TPRM · ISO 27001 / 27005 / 27036 · NIST CSF 2.0 · EBIOS RM · DORA · MiCA · GDPR · NIS 2 · CIAT model · Security Assurance Plans (SAP)

Blockchain & Digital Assets

Ethereum / Bitcoin / L2 architecture · Smart contracts · DeFi protocols · Stablecoins · Tokens (ERC-20, ERC-721) · On-chain analysis (Etherscan) · Chainalysis / Scorechain logic

Technical security & Development

Python (data parsing & automation) · SQL · Django · Bash · OWASP Top 10 · CI/CD · Burp Suite · Wireshark · Nmap · Git

Languages

French — native · English — professional B2, daily use · Chinese — intermediate
